

P3KI GmbH – Teserakt AG

P3KI

Partnership agreement summary

19/11/2018

Motivations and goals

Both companies share the beliefs that

- Security products must rely on secure software and engineering
- The other party's solution is innovative and addresses real security risks

Founded by pioneers in their fields, **P3KI** and **Teserakt** understand the actual threats to critical systems and how to prevent them, from their 20+ year experience.

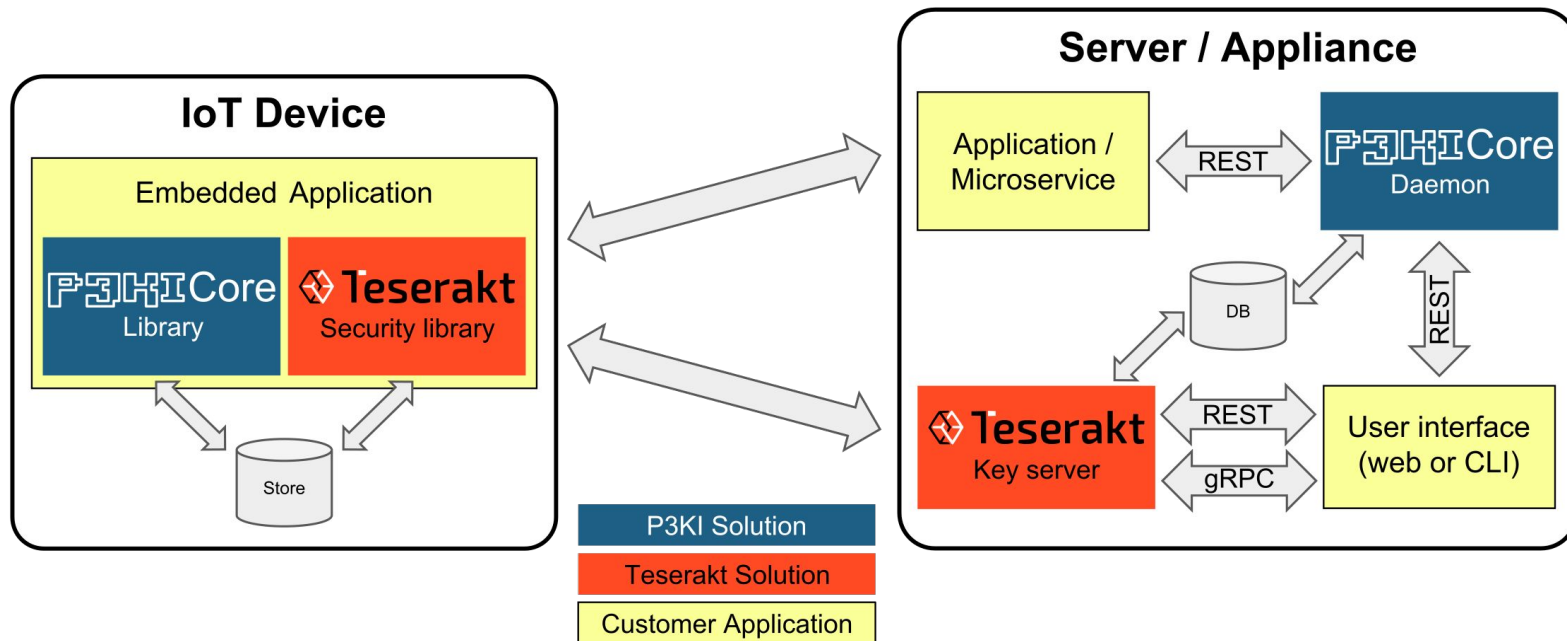

P3KI and **Teserakt** will jointly develop and offer a security solution for IoT platforms covering both flexible authorization & rights management, as well as communication security, thanks to:

- **P3KI's** decentralized trust management solution – <https://p3ki.com/>
- **Teserakt's** encryption and key management technology – <https://teserakt.io>

Joint offering summary

P3KI and **Teserakt** will bundle their services in a single appliance, offering:

- A **more secure system** than legacy PKI infrastructure and TLS encryption
- A **single integration project**, reducing administrative and commercial costs

R&D collaboration

P3KI and **Teserakt** will work together on products closely combining the two technologies and the team's core expertise. Potential projects include:

- Delegation-based ACL for large scale IoT deployments
- Decentralized infrastructure replacing legacy PKI & TLS

This research collaboration will lead to joint publication and commercial offerings.
